Chancellor Francis A. Sooy, MD, has announced with regret the decision of Shirley S. Chater, PhD, Academic Vice Chancellor, to leave that position in order to take a one-year educational leave which will begin September 12. Chater declared she intends to use the year to pursue postdoctoral studies, write and participate in a variety of educational and professional activities.

In his letter of acceptance, Sooy declared: "I want you to know how much I have appreciated the exceptional qualities you have brought to the Academic Vice Chancellor position. Your personal attention to some of the problems we have encountered has meant their effective resolution . . . the important role you have had in your leadership position has been invaluable to me and to the campus."

Dean Julius R. Krevans, MD, of the School of Medicine, who will assume the position of Chancellor as of July 1, stated: "I tried very hard to persuade Vice Chancellor Chater to remain, because of the superb job she has done in this position. She will be very hard to replace."

A member of the faculty at UCSF since 1964, Chater served as professor of Social and Behavioral Sciences before she was named Assistant Vice Chancellor for Academic Affairs in 1974. She became Vice Chancellor in 1977, making her the top ranking woman in the UC system.

Widely respected for her role as a national leader in health sciences education, she was elected last year to the prestigious Institute of Medicine of the National Academy of Sciences, and is a fellow of the American Academy of Nursing. She also is a member of the American Council on Education's National Identification Program for Women in Higher Education; an associate trustee of the University of Pennsylvania and a member of the Board of Overseers of the School of Nursing there; and a member of Women's Forum West. She also has been serving for the past seven years as the institutional member of the Association of Academic Health Centers. Chater received her BS from the University of Pennsylvania and her PhD in Education from UC-Berkeley.

The UC Regents' external auditors have asked UCSF to change its garage access control system in order to satisfy bond holder requirements.

Sometime in March, new cardtrols will be used. The only difference in the new system will be that the person parking must use the card to enter and leave the garage. The advantages of this new system are that cardtrol holders will be able to use an express exit after hours, eliminating the need to queue up, and garage security will be increased.

A detailed letter explaining the new system will be sent to all present card holders, along with the new cardtrols.

For further information contact Bill Stevens, manager, Parking Operations at x2566 or Assistant Vice Chancellor Cannon at x2496.

NEWS BRIEFS

UC is selling to the public one duplex and one single-family home on the west side of Third Avenue, the last of the 13 properties in this location to be sold by the University.

The properties to be sold by sealed bid are: 1367-69 Third Avenue (lot 12, Bl. 1758) duplex, zoned RH-2, minimum bid - $155,000 and 1379 Third Avenue (lot 14, Bl. 1758) single-family home, zoned RH-2, minimum bid - $175,000.

Three open houses have been scheduled to view these properties: Friday, March 12, 1 to 5 p.m.; Wednesday, March 24, 9 a.m. to 1 p.m.; and Tuesday, April 6, 10 a.m. to 2 p.m.

UC will consider financing for qualified buyers. The terms would require a 20 percent cash down payment of the purchase price. UC will carry an 80 percent loan secured by the property at 15 percent per annum interest only, with interest payable on a monthly basis, with the entire balance due five years from the date of note or upon sale or transfer of the property.

The sale will be managed by UC Systemwide Office in Berkeley. For bidding, financial and inspection instructions contact the UC Real Estate Office, Room 615, 2200 University Avenue, Berkeley, CA 94720 or call (ATSS) 5-582-6101.

Bids close on Thursday, April 22, 5 p.m. Public bids open Friday, April 23, 1:30 p.m., Room 690, 2200 University Ave., Berkeley.

For any additional information contact Robert LaPointe at x1131.

The Gladstone Foundation Laboratories for Cardiovascular Disease will hold its third annual symposium on Tuesday, March 9, in Room C 701 at UCSF from 9:30 to 11:30 a.m. The title is "Concepts from Cell Biology: Membrane Structure and Function."

Topics and speakers include: S.J. Singer, PhD, a recognized authority on cell biology from UC-San Diego, "Biological Membranes: Unique Two Dimensional Solutions"; Demetrios Papahadjopoulos, PhD, Cancer Research Institute, "Liposomes: From Membrane Modeling to Cellular Targeting"; and David R. Phillips, PhD, associate professor, Pathology, "Platelet Membrane Glycoproteins in Aggregation."

The fifth and final limerick presented by the Hospitals Auxiliary is:

Of this Alexander we'll state:
You either like him a lot or you hate.
If he talks like Brzezinski,
In a pinch you'll drink whiskey,
But he always must fish or cut bait.

Guess all five limericks and win a free ticket to the private benefit showing of "The Search for Alexander" to be held at the De Young Museum on Thursday, March 4.

Door prizes also are available to all those who purchase tickets, including a cruise for two on the Delta Steamship Line to Vancouver, two round trip tickets to Hawaii and a week for two at the Whaler Condominium in Maui, a weekend for two at the Pacific Plaza Hotel and dinner for two at Donatellos, one night in the Honeymoon Suite at the Hotel Leger on Mokelumne Hill in the gold country, two round trip tickets to Reno, and a Zenith 19 inch color TV.

Benefit tickets at $15 each may be purchased at the Auxiliary Office, Room M 180B (next to Moffitt cashier). For further information contact Eileen Puppo, x4906.

The Alumni-Faculty Association of the Department of Psychiatry will hold its Fifth Annual Meeting on Saturday, March 6 in the Langley Porter Auditorium.

Entitled "The Use of the Creative Arts in the Therapeutic Process," the program will explore how the integration of the creative arts and psychotherapy can benefit patients. The program also will examine insights from the creative arts that support synthetic processes in different stages of therapy.

For registration information call x2894; program information x77-395.

The Accounting Satellite Office (AC-7) has been moved to the Student Services Building, Upper Level (520 Parnassus). Marjorie Fiske, professor of Social Psychology and Psychiatry, has retired as director of the Human Development and Aging Program. She will continue her research and teaching at UCSF.

Fiske is the author of several books including *Middle Age: The Prime of Life?* which has been published in 12 languages in 21 countries thus far.

Fiske came to UCSF in 1958 as a principal investigator in LPPI's Geriatric Research Project, which eventually grew into the Human Development and Aging Program. She developed its PhD program in 1976.

Fiske received a Doctor of Science degree, Honoris Causa, from Mount Holyoke College in 1976, where she received her BA. She received her Masters from Columbia.

Employees at risk of contracting Q Fever (those working with sheep research or those exposed to the infectious organism, Coxiella burnetii, and all those people who enter MR I or II) are urged to participate in UCSF's medical surveillance program through the Employee Health Service. The program consists of free annual physical examinations and free serological tests.

All employees who have had Q Fever, or believe they have it, should contact their supervisors to arrange for follow-up and consultation at the Employee Health Service. Symptoms are fever, headaches, weakness, cough and chills. For further information on this screening for Q Fever contact Elaine Ginnold at x4318.

Several thousand dishes, trays and pieces of flatware are missing from the Moffitt cafeteria and patient areas. During a recently reviewed five-month period, a total sum of more than $15,000 was needed to replace lost supplies — an unnecessary waste of patient and customer funds. Lost items included more than 350 dozen soup spoons, and more than 900 dozen teaspoons and forks.

All UCSF faculty, staff, employees and students are asked to please return all dishes and trays to the cafeteria and in the future to use disposable ware. Individuals who have suggestions for reducing these losses should stop by Nutrition and Dietetics in Room M 294.

Three Bay Area chapters of Sigma Theta Tau, the national honor society of nursing, will gather Thursday, March 11 at the Fort Mason Officers' Club for a banquet and program, starting at 7 p.m.

Featured speaker will be Carol A. Lindemann, RN, PhD, president of the National Council of Sigma Theta Tau. She will speak on "Influencing the Future." Special guests include: Margretta Styles, dean, UCSF School of Nursing; Joan Green, acting dean, USF School of Nursing; and Fay Bowers, chair, Department of Nursing, San Jose State University.

Members of Sigma Theta Tau and other interested parties are invited to attend. Tickets for members are $10; non-members $12. For further information call x4302.

John D. Michenfelder, professor of Anesthesia at the Mayo Clinic in Rochester, Minnesota, will be the Stuart C. Cullen Visiting Professor. He will present two lectures: "Anesthesia for Cerebral Vascular Surgery," in Room HSW 303 at 5 p.m. on Wednesday, March 3 and "Current Concepts in Cerebral Resuscitation/Protection" (given in conjunction with Neurosurgical Grand Rounds) in Room HSW 302 from 5 to 6:30 p.m. on Thursday, March 4.

Michenfelder is currently editor-in-chief of *Anesthesiology*, the journal of the American Society of Anesthesiologists and a leading authority on anesthesia for neurosurgical procedures and protection of the brain before and after ischemia.

The professorship is named in honor of the former chair of the Department of Anesthesia and dean of the School of Medicine from 1966 to 1970, who died in 1979.

The American Cancer Society has awarded the School of Medicine a $50,000 Research Development Grant to study "Kaposi's Sarcoma" in gay men. John Ziegler, MD, professor of Medicine at UCSF and Associate Chief of Staff for Education at the VAMC, is the principal investigator. Co-investigators are Marcus Conant, MD, Department of Dermatology, and Paul Volberding, director of Oncology, SFGH.

Kaposi's Sarcoma, a rare form of skin cancer, and other "opportunistic" infections have afflicted gay men with increasing incidence over the past three years. Several theories are being tested. Gay men are being urged to report to their physicians any unusual lymph gland swelling, sores or tumors in the mouth, or the appearance of purple spots or bumps on the skin. UCSF has set up a special clinic to evaluate and treat this condition. For an appointment call x2051.

The Western States Conference on "Cancer Rehabilitation: Psychosocial, Physical and Economic Interventions" will be held Thursday to Saturday, March 25 to 27 at the Fairmont Hotel.

Distinguished practitioners will present research advances and their practical applications during this comprehensive interdisciplinary conference on the care of people living with cancer.

The conference is sponsored by the Northern California Cancer Program, California Division of the American Cancer Society, UCLA Jonsson Comprehensive Cancer Center, Los Angeles County-USC Comprehensive Cancer Center, Community Cancer Control of Los Angeles, and the S.F. Regional Cancer Foundation.

For further information contact Carrie Ewing, 497-7431.

Forty-two percent of those who lost their lives after Bay Area traffic accidents may have died needlessly because of uncoordinated emergency care, according to a recent study by Donald Trunkey, MD, chief of Surgery at SFGH.

The study, based on a review of 302 autopsy reports from eight Bay Area counties (not including S.F.) was published in the February issue of *San Francisco Medicine.*

Solano and Marin counties had the highest percentages of preventable deaths. San Francisco, which has a trauma center at SFGH, was not included in the study, but figures gathered during an earlier comparison of trauma care in San Francisco and Orange counties found that only one of 92 S.F. auto deaths was preventable.

To improve Bay Area emergency care, Trunkey recommends that at least four more trauma centers be designated with priority given to establishing one in the South Bay and one in the East Bay. In addition, he urges that a single helicopter-ambulance system be created for the entire Bay Area.
